

UNDERCOVER INVESTIGATIONS

Castle Security Group stands ready to provide our corporate clients with trained and licensed covert personnel who are able to blend into your current workforce to provide information vital to the continued success of your business.

All assigned covert agents are supervised daily by experienced members of our staff who are trained to provide case management skills with continual guidance and investigative expertise.

An undercover operative is usually assigned for a specific purpose; however, quite often the operative will uncover other information unknown to management, which may be harmful and costly to the business until corrected. Typical incidents include: drug abuse; drinking on the job; misuse of company property; violations of company policy; thefts and other serious situations that may impact negatively on the company.
